SUMMARY

Software Engineer with a background in fine-dining culinary scene for 7 years. My strong passion and creativity towards Culinary Arts easily transformed into building software products. I found a similar connection in the level of focus in perfecting a dish to finding a path to solve problems.

PROJECTS

Minesweeper (github) — *HTML, CSS, JavaScript*

Simple Minesweeper Game using HTML, CSS, Java Script.

Nathan's recipe blog (github) — *MongoDB, Mongoose, Express, Google-OAuth, Material Design*

Make recipe sites from my experience using MongoDB, Mongoose, Express, Google-OAuth and Material design for styling.

More projects (github) — *HTML, CSS, JavaScript*

Simple Minesweeper Game using HTML, CSS, Java Script.

EXPERIENCE

The Shota, San Francisco, CA — *Sushi & Kitchen Chef*

MAR 2019 - MAR 2020

Trained and supervised new staff members. Took charge of kitchen team activities to assure accurate food preparation, attractive plating, and timely delivery with precise food temperature.

Kusakabe, San Francisco, CA — *Sushi & Kitchen Chef*

OCT 2016 - MAR 2019

Served as a sushi & kitchen chef in an Omakase(Chef's Choice Prix Fixe Menu) restaurant serving Sushi-in-Kaiseki style. Served from 2 up to 6 customers at a bar setting. Assisted Kaiseki chef to successfully execute the entire course meals.
